Product Introduction

Professional Face Recognition NVR

Key Features

- FR 20+ faces/s, 1200+ faces/min
- 10000+ face library, 16 groups
- Balck&White list alarm
- Face smart search
- Camera remote upgrade
- Video encryption

1080P Professional Face Capture Cameras

Key Features

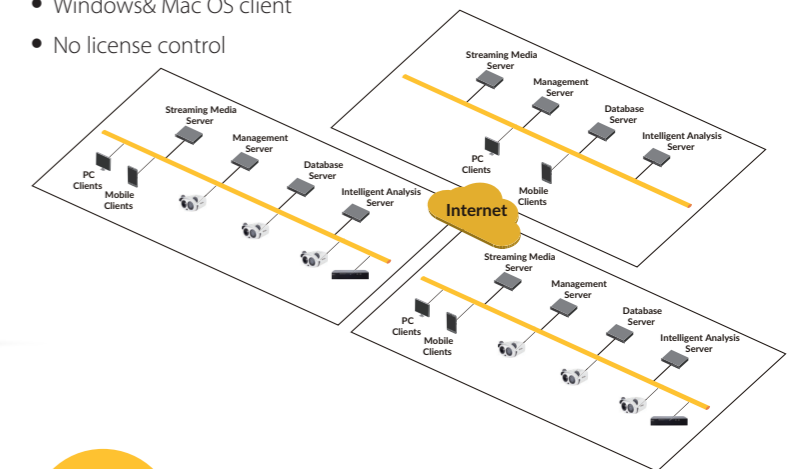

- 60 faces per frame
- Face and body capture
- Detection success rate > 97%
- Deviate angle pan 0-180 ,tilt $\pm 45^\circ$ C ,up and down $\pm 25^\circ$ C
- Open SDK/CGI for integration

Sunview Platform

Key Features

- Large scale layout
- Face recognition system
- 1000,000 faces library
- 10000 channels access
- Face smart search ,face tracking
- Sunell products unified management
- Windows& Mac OS client
- No license control

Mobile APP Sunview

Key Features

- Sunell products unified management
- Remote face enroll
- Event push message
- Two way audio
- Remote playback and backup

Sunell Typical Solutions

Smart Detection

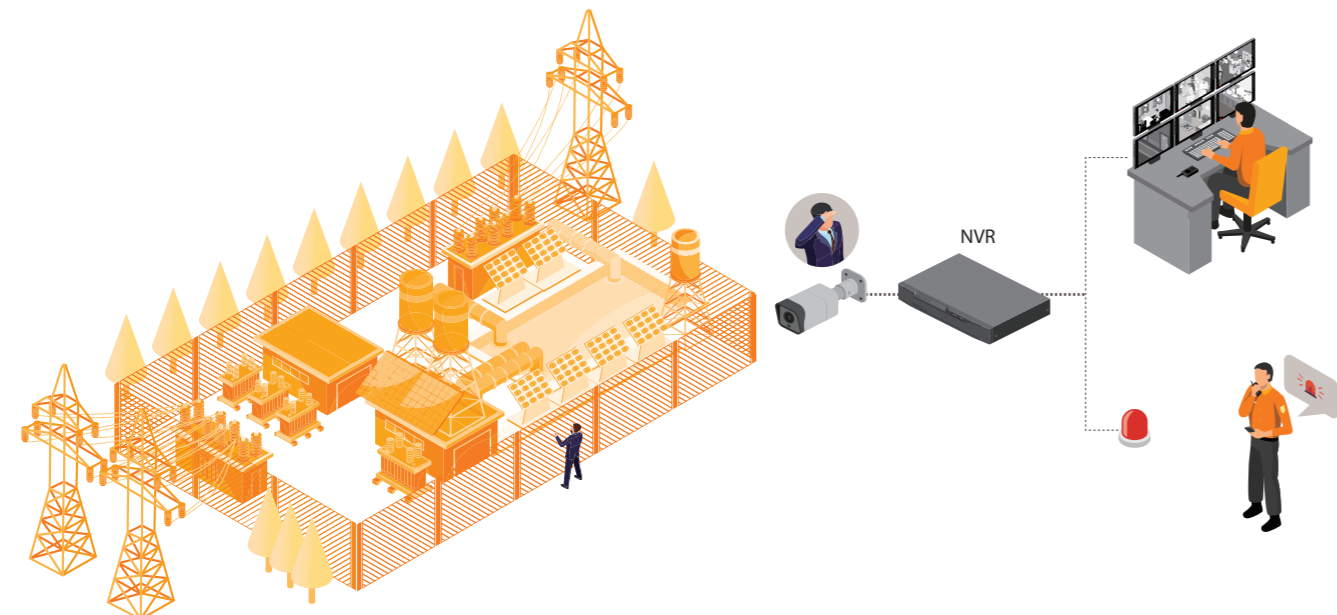

Key Features

- Human intrusion Smart detection
- Reduce false alarm
- Easy integration

Camera triggers alarm only when detects human, thus helping in reduction of the false alarm caused by animal, object, trees, shadow etc. Camera simply works with NVR and supports events output. When alarm is triggered, camera sends notification to NVR to activate the pop-up video, alarm, and to start recording video.

Security Zones

Intelligent Business Store

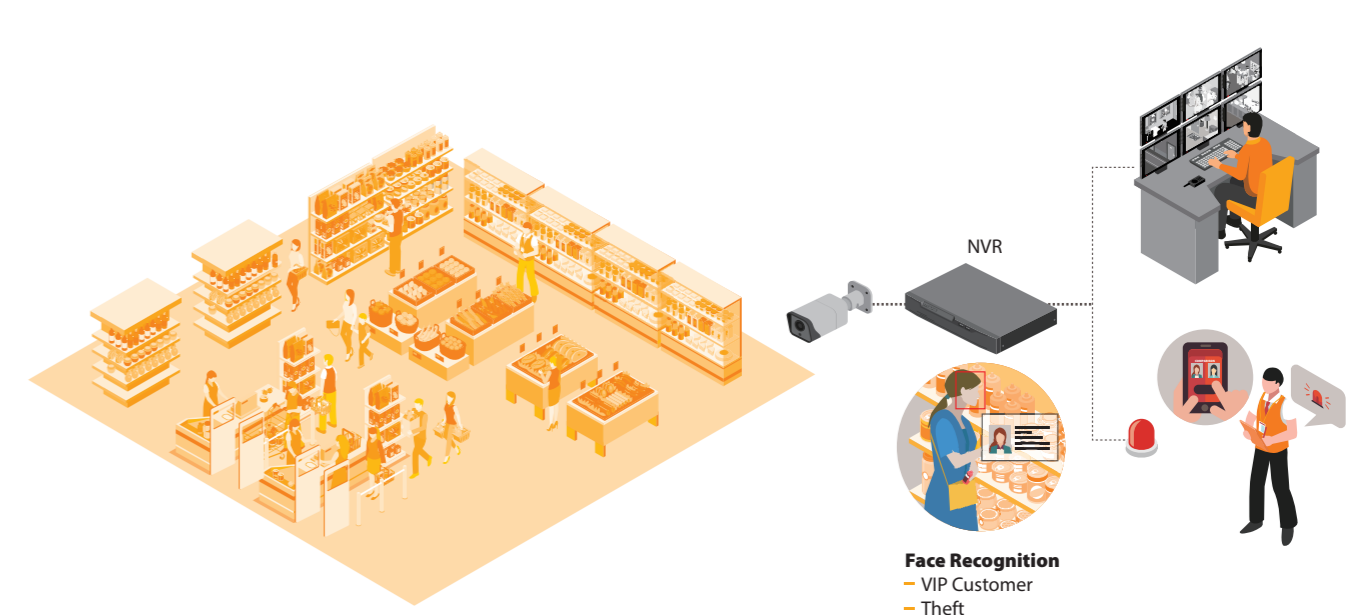

Key Features

- Black&White list alarm
- Easy guard
- Push message to APP

Camera captures faces, and send captured frames to NVR for further recognition whether this person is VIP customer or a thief, after recognition is done, triggers alarm, starts video recording, and push message sends to an APP where it is possible to achieve remote enroll of the person's information by the received picture.

Shop, Office, Business Hall etc.

Area Security Management

- Black & White List
- Face Smart Search
- Person Tracking

Key Features

- Multiple architectures system
- Finding the missing person or a criminal

The face capture cameras are installed at the walkways, when event is happening, operator can quickly search a person by the image saved on a server. This central data server is managing all cameras, and also does face recognition. It is possible for a client to have an access to the server from different locations.

Shopping Mall, Garden, Tourist Area, Hotel etc.
