#### **System Overview**

Eco series products support simplicity of using existing cabling infrastructure with HDVI. It features a compact design and high quality image. It's suitable for the scenes requires high definition image display such as finance, government, schools, shops, airports, factories and hotels and so on.

#### **Functions**

#### 4 Signals over 1 Coaxial Cable

HDVI technology supports 4 signals to be transmitted over 1 coaxial cable simultaneously video data. Dual-way data transmission allows the HDVI camera to interact with the DVR, such as sending control signal or triggering alarm.

#### **Long Distance Transmission**

HDVI technology guarantees long-distance and real-time transmission without any loss. It supports up to 300m for 1080P Full HD video via coaxial cable.

#### **Simplicity**

HDVI technology inherits the born feature of simplicity from traditional analog surveillance system, making itself a best choice for investment protection. HDVI system can seamlessly upgrade the traditional analog system without replacing existing coaxial cabling. The plug and play approach enables full HD video surveillance without the hassle of configuring a network.

#### **Environmental**

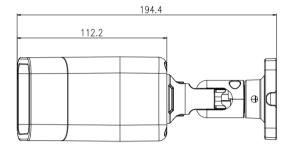

With a temperature range of -10 °C to +50 °C (14 °F to +131 °F). Subjected and certified to rigorous dust and water immersion tests, the IP66 rating makes it suitable for demanding outdoor applications.
